EDUCATION

Northeastern University Boston, MA
Master of Science, Information Systems – **GPA: 3.7/4.0** Aug 2026
Relevant Coursework: Advanced Data Warehouse for Business Intelligence, Database Management & Design, Risk Management

Mumbai University - Thadomal Shahani Engineering College Mumbai, IN
Bachelor of Engineering, Electronics & Telecommunication – **GPA: 3.2/4.0** May 2024

PROFESSIONAL EXPERIENCE

AI/ML Engineering Intern | Twintual; Boston, MA Jan 2026 - Jun 2026

- Architected a versioned, automated LLM evaluation harness in Python to benchmark multi-step email generation pipelines across 7 releases, executing 150+ scenario-based test runs and establishing a repeatable framework for model regression testing
- Integrated 4+ LLM providers via API orchestration, producing rubric scores & cost comparisons that drove model selection
- Automated a deterministic rubric-scoring pipeline across 7 versions, cutting manual QA effort by 80% enabling A/B analysis
- Developed token-level cost instrumentation and quality-vs-spend analytics using Pandas & Matplotlib cutting API spend by 35%

Graduate Analyst | FMJR Wollastons; Boston, MA Jan 2025 - May 2026

- Engineered Power BI data models for inventory & supply chain reporting, improving load performance by 34% surfacing 5+ KPIs
- Audited & validated 50K+ inventory & sales records using SQL, uncovering demand forecasting inefficiencies reducing 14% spend
- Automated Power BI reporting for inventory turnover, stockouts & demand forecasting trends reducing reporting errors by 25%
- Delivered ad-hoc inventory and demand forecasting analysis using Excel and MS Access, providing data-driven recommendations that informed 3+ cross-functional replenishment decisions monthly

Data Analyst Intern |Kritexco; Mumbai, IN June 2022 - May 2023

- Engineered production-ready ETL pipelines using SQL and Airflow, reducing data refresh times from 6 hours to 30 minutes
- Transformed 500K+ raw customer sales records into analysis-ready datasets using Python cutting, manual processing by 60%
- Built executive Power BI dashboards tracking churn, demand & regional sales trends accelerating stakeholder decision by 45%

PROJECTS

Food Inspection ETL Pipeline (Databricks, PySpark, Delta Live Tables, Alteryx, ER/Studio, PowerBI)

- Built an end-to-end food inspection data pipeline on Databricks using PySpark and Delta Live Tables, unifying multi-city schemas into a governed medallion architecture with automated data quality checks and SCD Type-2 tracking across 180K+ records.
- Designed a star-schema data model & Power BI dashboards on top of the pipeline, cutting reporting time by 73% with data loss.

Seattle Pet Licenses Data Pipeline (Azure Data Factory, Snowflake, Azure Blob Storage, Parquet, Tableau)

- Architected an Azure Data Factory master pipeline orchestrating 3 sub-pipelines to ingest, transform, and bulk-load data across 13 Snowflake datasets, with post-load validation ensuring zero data loss across all dimension and fact tables
- Designed a 5-table star schema in Snowflake resolving breed hierarchies to species-scoped surrogate keys and enriching records via ZIP-to-geography joins, powering Tableau dashboards that improved outreach targeting by 30%

TECHNICAL SKILLS

- **Languages & AI Tools:** Python (Pandas, NumPy, PySpark), SQL, R, Claude Code, Cursor, n8n, Codex
- **Data Engineering & Orchestration:** Airflow, dbt, PySpark, Kafka, Data Profiling, Data Mining, Data Modeling, ETL/ELT Development, Azure Data Factory, Databricks, Snowflake,E/R Studio, Alteryx
- **Databases & Storage:** MySQL, PostgreSQL, NoSQL (MongoDB), Azure Blob Storage, Parquet, Delta Lake, BigQuery
- **Machine Learning & AI:** Scikit-learn, XGBoost, TensorFlow, PyTorch, LLMs, RAG, LangChain, Statistical Analysis, A/B Testing
- **Visualization & BI: T**ableau, Power BI, Looker Studio, Advanced Excel
- **Cloud, MLOps & DevOps:** AWS, Microsoft Azure, GCP, Docker, Kubernetes, MLflow, Git/GitHub, CI/CD
